| P1 | Severe Anemia Post-Immunoglobulin Therapy in Kawasaki Disease: Population-Based Study Involving 8262 Pediatric Cases  
Masato Takeuchi (Department of Pharmacoepidemiology, Graduate School of Medicine and Public Health, Kyoto University, Kyoto, Japan) |
| P2 | Seasonal Differences in the Clinical Course of Kawasaki Disease  
Daisuke Shimizu (Department of Pediatrics, University of Occupational and Environmental Health, Japan, Kitakyushu, Fukuoka, Japan) |
| P3 | Decline in Fertility Rate Is Associated with Spatial Spread and Increase of Kawasaki Disease in Japan  
Yoshiro Nagao (Seijinkai Shizunai Hospital, Shin-Hidaka-cho, Hidaka-gun, Hokkaido, Japan) |
| P4 | A 3-year Prospective Descriptive Study of the Epidemiology, Clinical Manifestations and Management of Kawasaki Disease (KD) at Costa Rica's National Children's Hospital: June 2014 to May 2017  
Rolando Ulloa-Gutierrez (Servicio de Infectologia Pediatrica, Hospital Nacional de Ninos "Dr. Carlos Saenz Herrera"; Centro de Ciencias Medicas, Caja Costarricense de Seguro Social (CCSS). San Jose, Costa Rica) |
| P5 | Urinary Tract Infection in Acute Kawasaki Disease  
Jibiki Toshiaki (Department of Pediatrics, Chiba Kaihin Municipal Hospital, Chiba, Chiba, Japan/Department of Pediatrics, Chiba Aoba Municipal Hospital, Chiba, Japan) |
| P6 | The Epidemiology And Seasonality Of Kawasaki Disease In Children Admitted In A Tertiary Hospital From Year 2001-2016  
Danize Edika K. Buemio (Department of Pediatrics, The Medical City, Pasig City, Philippines) |
| P7 | Update of 2015-2017 Kawasaki Disease Surveillance in Emilia Romagna, a Northern region of Italy  
Elena Corinaldesi (Department of Pediatrics, Ramazzini hospital, Emilia-Romagna, Italy) |
| P8 | Prediction of Intravenous Immunoglobulin-Resistance in Kawasaki Disease  
Yongbing Chen (Department of Pediatrics, Peking University First Hospital, Beijing, China) |
| P9 | Relationship between Tropospheric Weather and Incidences of Kawasaki Disease in Japan's Nine Major Cities (1990-2014)  
Takashi Sano (Department of Public Health, Jichi Medical University, Tochigi, Japan) |
| P10 | 50 Years on, Numbers from Mumbai, India; early but Escalating!  
Vijay Viswanathan (Department of Pediatrics, Jupiter Hospital, Maharashtra, India) |
P11 Spatiotemporal Patterning of Kawasaki Disease Cases In Western New York  
Arthur Chang (Department of Pediatrics, University at Buffalo, New York, USA)

P12 Epidemiology of Kawasaki Disease in Canada (2012-2014)  
Brian W. McCrindle (Department of Pediatrics, University of Toronto, The Hospital for Sick Children, Ontario, Canada)

P13 Change of Cardiac Sequelae in Recurrent Kawasaki Disease Patients over the Last 30 Years: A Comparison with a Previous Study  
Daisuke Sudo (Department of Public Health, Jichi Medical University, Tochigi, Japan)

P14 The Demographic and Clinical Characteristics of Kawasaki Disease in Malaysia from Year 2010 to 2016  
Liang Choo Hung (Department of Pediatrics, Paediatric Institute, Hospital Kuala Lumpur, Kuala Lumpur, Malaysia)

P15 Recurrent Kawasaki Disease: Experience from a Tertiary Care Center at Chandigarh, North India  
Sandesh Guleria (Advanced Pediatrics Center, Post Graduate Institute of Medical Education and Research, Chandigarh, India)

P16 Kawasaki Disease in Children More Than 10 Years: A Single Centre Experience from Chandigarh, North India  
Rakesh Kumar Pilania (Allergy Immunology Unit, Department of Pediatrics, Advanced Pediatrics Centre, Post Graduate Institute of Medical Education and Research (PGIMER), Chandigarh, India)

P17 Association between Redness at the BCG Vaccine Inoculation Site and Cardiac Sequelae  
Haruki Takigawa (Student of Jichi medical university, Tochigi, Japan)

P18 Impact of Socioeconomic Status on Outcomes of Patients with Kawasaki Disease  
Audrey Dionne (Department of Cardiology, Boston Children's Hospital, Department of Pediatrics, Harvard Medical School, Massachusetts, USA)

P19 Kawasaki Disease Long-Term Study in the Siberian Region of the Russian Federation  
Loudmila V. Bregel (Irkutsk State Medical Academy of Postgraduate Education - Branch of the FSBEI FPE RMACPE MOH, Irkutsk, Russia)

P20 Epidemiology of Kawasaki Disease in Thailand: Data from National Health Security Office IVIG Audit  
Suthep Wanitkun (Department of Pediatrics, Ramathibodi Hospital, Mahidol University, Bangkok, Thailand)
P21  Historical Trends in Kawasaki Disease: Experience at a Single Institution  
      Annette L. Baker (Department of Cardiology, Boston Children's Hospital, New York, USA)

P22  Incidence of Recurrent Kawasaki Disease at a Single Center in North America since 1984  
      Annette L. Baker (Department of Cardiology, Boston Children's Hospital, New York, USA)

P23  Can We Define the Risk of Intravenous Immunoglobulin Resistance in a Non-Asian Population Using Nationwide Kawasaki Disease Dataset (KAWANET)?  
      Maryam Piram (AP-HP, CHU de Bicetre, Pediatric Rheumatology, CEREMAJA, France)

P24  Worldwide Distribution of Kawasaki Disease: Predictive Model and Simulation of Global Estimates  
      Cedric Manlhiot (Department of Pediatrics, University of Toronto, The Hospital for Sick Children, Ontario, Canada)

P25  Epidemiologic Evidence of Spatiotemporal Clustering of Kawasaki Disease Cases and Coronary Artery Aneurysms in Canada  
      Cedric Manlhiot (Department of Pediatrics, University of Toronto, The Hospital for Sick Children, Ontario, Canada)

P26  Epidemiology of Refractory Kawasaki Disease in Taiwan: 2010-2014  
      Liang Yun-Chieh (Clinical Trial Center, National Taiwan University Hospital, Taipei, Taiwan)

P27  Giant Aneurysms Post-Kawasaki Disease: A Retrospective Study and Case Control Analysis  
      TLJ Choo (Cardiology, KK Women's and Children's Hospital, Singapore)

P28  Trends of Kawasaki Disease Diagnosed in Last 24 Years at Chandigarh, North India  
      Kanika (Advanced Pediatrics Centre, Postgraduate Institute of Medical Education & Research, Chandigarh, India)

P29  Kawasaki Disease Incidence at Chandigarh, North India: 2015 -2017  
      Rajni Kumrah (Advanced Pediatrics Centre, Post Graduate Institute of Medical Education and Research, Chandigarh, India)

P30  Descriptive Epidemiologic Features of Kawasaki Disease in Japan: Results of the 24th Nationwide Survey  
      Mayumi Yashiro (Department of Public Health, Jichi Medical University, Shimotsuke, Tochigi, Japan)

P270. Low Molecular Weight Heparin (LMWH) Vs. Warfarin for Initial Thromboprophylaxis in Children with Coronary Artery Aneurysms (CAAs) after Kawasaki Disease
Cedric Manlhiot (Department of Pediatrics, University of Toronto, The Hospital for Sick Children, Ontario, Canada)

P271. Coronary Artery Status in Kawasaki Disease after 10 Years of Diagnosis: A Radiation Optimised CT Angiography Study
Manphool Singhal (Department of Radiodiagnosis & Imaging, Postgraduate Institute of Medical Education and Research, Chandigarh, India)

P272. Coronary Artery Aneurysm Regression after Kawasaki Disease in a Mexican Population
Eduardo Bustillo-Del Cueto (Cardiology Department, Instituto Nacional de Pediatría, Mexico City, Mexico)

P273. Medium-Term Complications Associated with Coronary Artery Aneurysms after Kawasaki Disease: A Study from the North American Kawasaki Disease Registry
Brian W. McCrindle (Department of Pediatrics, University of Toronto, The Hospital for Sick Children, Ontario, Canada)

P274. Structural Features of Coronary Artery Aneurysms Associated with Normalization of Luminal Diameter after Kawasaki Disease
Mathew Mathew (Department of Pediatrics, University of Toronto, The Hospital for Sick Children, Ontario, Canada)

P275. Clinical Significance of Late Onset Arthritis in Kawasaki Disease
Yi Seul Kim (Department of Pediatrics, Cardiology, Samsung Medical Center, Sungkyunkwan University School of Medicine, Seoul, Korea)

P276. Assessment of Cardiopulmonary Function in Adolescents Previously Affected by Kawasaki Disease
Tsung-Hsun Yang (Department of Physical Medicine and Rehabilitation, Kaohsiung Chang Gung Memorial Hospital and Chang Gung University College of Medicine, Taiwan)

P277. Autonomic Dysregulation Remotely after Kawasaki Disease Is Associated with Onset Myocardial NT-proBNP Release
Jacques Delfrates (Division of Pediatric Cardiology, CHU Ste-Justine, University of Montreal, Quebec, Canada)

P278. Correlation between Onset N-TERMINAL PRO-BRAIN Natriuretic Peptide (NT-PROBNP) with Myocardial Function and Electrocardiographic Parameters in Kawasaki Disease
Nagib Dahdah (CHU Ste-Justine, University of Montreal, Quebec, Canada)
P279  Long-Term Follow-up of Children Diagnosed with Kawasaki Disease Younger than 12 Months of Age in a Mexican Population
Samia Gaffare-Aranda (Cardiology Department, Instituto Nacional de Pediatría, Mexico City, Mexico)

P280  An Adult with Fever and Facial Nerve Palsy- Age is No Bar for Kawasaki Disease
Ankur Kumar (Allergy Immunology unit, department of pediatrics, Advanced Pediatrics Centre, Postgraduate Institute of Medical Education and Research, Chandigarh, India)

P281  Prolonged Vascular Remodeling and Pre-Atherosclerotic Changes in Kawasaki Disease Vasculitis: Migration and Transformation of Alpha-SMA-positive Cells with Macrophage-Like Activity and Extracellular Matrix Production in Rabbit Model
Kenji Hamaoka (Pediatric Cardiology & Kawasaki Disease Center, Ujitokushukai Medical Center, Kyoto, Japan)

P282  A Case of Kawasaki Disease on an Adult: Review of the Published Works in Japan
Ayumi Hayashi (Department of Pediatrics, Toho University Ohashi medical center, Tokyo, Japan)

P283  Complex Kawasaki Disease: Exploring Adolescents' and Parents' Educational and Psychosocial Intervention Needs and Disease Impact
Nita Chahal (Department of Pediatrics, University of Toronto, The Hospital for Sick Children, Ontario, Canada)

P284  A Phenomenology Study of Indonesian Mothers' in Caring for Children in the Acute Phase of Kawasaki Disease
Lia Kartika (Faculty of Nursing, University of Indonesia, Jawa Barat, Indonesia)

P285  Plasma H2S Predicts Coronary Artery Lesions in Children with Kawasaki Disease
Yan Sun (Department of Pediatrics, Peking University First Hospital, Beijing, China)

P286  Clinical Feature and Mid-Term Follow-Up of Kawasaki Disease in Infants Under Three Months in Southern Chinese Population
Wei Li (Departments of Cardiology, Guangzhou Women and Children's Medical Center, Guangzhou, Guangdong, China)

P287  Diagnosis and Treatment of Kawasaki Disease
Ziqian Zeng (Department of Cardiology, Children's Hospital of Fudan University, Shanghai, China)

P288  The Example of 1 Boy of Kawasaki Disease Which Appeared on the 14th
Yoshinori Murashima (Department of Pediatrics, Pediatric Center, Uwamachi Hospital, Kanagawa, Japan)
P289 Coronary Bypass Surgery on the Beating Heart of the Infant with Kawasaki Disease, Complicated with a Giant Aneurysm Thrombosis of the Left Coronary Artery and an Acute Myocardial Infarction
Loudmila V. Bregel (Irkutsk State Medical Academy of Postgraduate Education - Branch of the FSBEI FPE RAMCPE MOH, Irkutsk, Russia)

P290 Breastfeeding for 6 Months or More May Reduce the Risk of Coronary Artery Lesions in Patients with Kawasaki Disease
Mindy M-H. Guo (Department of Pediatrics, Kaohsiung Chang Gung Memorial Hospital, Kaohsiung, Taiwan)

P291 Recurrent Kawasaki Disease: A Case Report of Three Separate Episodes Occurring Approximately Every Five Years
Nikita Goswami (Department of Rheumatology, Children's Hospital of Los Angeles, California, USA)

P292 The Electrophysiological Index of Transmural Dispersion of Repolarization (Tpeak to Tend /QT) Can Predict the Response of Immunoglobulin Therapy and Subsequent Coronary Artery Lesions in Kawasaki Disease
Tadayoshi Hata (Department of Pediatrics, Fujita Health University, Aichi, Japan)

P293 Antibiotic Use in Children with Kawasaki Disease
Soo-Young Lee (Department of Pediatrics, College of Medicine, The Catholic University of Korea, Seoul, Korea)

P294 Serial Changes in Study Designs of Abstracts Presented at Meetings of the Japanese Society of Kawasaki Disease: A Systematic Review
Kentaro Fujimori (Department of Postgraduate Education and Training, National Center for Child Health and Development, Tokyo, Japan)

P295 The Effects of Storage Temperature and Duration of Blood Samples on DNA and RNA Qualities
Pei-Hsien Lin (Genomics and Proteomics Core Laboratory, Department of Medical Research, Kaohsiung Chang Gung Memorial Hospital, Kaohsiung, Taiwan)

P296 Urticaria in Patients with Kawasaki Disease
Avinash Sharma (Paediatric Allergy Immunology Unit, Post Graduate Institute of Medical Education and Research, Chandigarh, India)

P297 Clinical Characteristics and Risk Factors of 556 Cases of Kawasaki Disease
Jinhua Piao (Department of Pediatrics of the First Hospital of Jilin University, Changchun, China)

P298 Kawasaki Disease and Down Syndrome: A Rare Association. A Mexican Experience
Ana Jocelyn Carmona-Vargas (Cardiology Department, Instituto Nacional de Pediatría, Mexico City, Mexico)
P299 Establishment and Application of Kawasaki Disease Assisted Decision-making System
Bei Jiang (Information Technology Department, Shanghai Children's Hospital Affiliated to Shanghai Jiaotong University, Shanghai, China)

P300 Applicability of Asian Risk Score to a Mostly Caucasian Population: Our Experience
Marianna Fabi (Department of Pediatrics, Sant'Orsola Malpighi University Hospital, Bologna, Italy)

P301 Prolonged Gall Bladder Hydrops in Kawasaki Disease Patient
Kyung Lim Yoon (Department of Pediatrics, Kyung Hee University Hospital at Gangdong, Seoul, Korea)
