Welcome Messages

It is my great pleasure and honor to host The Scientific Meeting of Japan-Hungary-Poland Surgical Society (JHPSS2014) in Tokyo, Japan. It has been fourteen years since the First Scientific Meeting of the Japan-Hungary Surgical Society was held in Budapest, Hungary in September 2001 under the wonderful leadership of Professor Josef Sandor. Through that success and the ensuing four meetings, we have deepened scientific exchanges and warm friendship between Japanese and Hungarian surgeons. This year, we start a new chapter in our history by welcoming Poland, represented by another founding co-president, Prof. Grzegorz Wallner, into our society.

Now that we have become a tripartite society, we have set the theme of this year’s meeting as “A Triangle of Collaboration for the Development of Advanced Surgery—Take off for the Future.” We expect to have an active exchange of views among participants, especially the younger researchers from Japan, Hungary and Poland. We sincerely hope that this meeting will be an excellent opportunity for clinicians and researchers from the three countries to deepen their ties, acquire more information, and convey the advanced and effective findings from their research on surgery.

The host city, Tokyo, is an inspiring place to visit no matter how many times you've been here before, offering everything from traditional culture and entertainment to the latest trends and technologies. Please be sure to join the excursion we are planning and experience the vibrancy of this enchanting city.

We very much look forward to greeting you in Tokyo for what promises to be an exciting meeting full of discussion, controversy, innovation and, of course, friendship.

President of JHPSS2014
President of International University of Health and Welfare
Dear colleagues and friends,

18 years have already passed from 1996 when together with Professor Kitajima we were shaking hands and founded the Japan-Hungary Surgical Society. From 2001 we have organized five common surgical symposia in Budapest and in Tokyo alternately. The present event is the 6th Scientific Meeting of the Japan-Hungary Surgical Society – but this time this is much more!

It is my honour to welcome Professor Grzegorz Wallner and our friends, the Polish surgeons in Tokyo at the meeting of the tripartite society, at the Scientific Meeting of the Japan - Hungary - Poland Surgical Society. The Hungarian surgeons are looking forward the “Triangle of Collaboration for the Development of Advanced Surgery”.

Three famous scientists of the three countries represent the development of surgical science and education: their work is a message for us from the 19th century. This year we are celebrating János Balassa, a patriot and the father of modern surgery in Hungary who was born just 200 years ago. He performed operations by ether anesthesia in Budapest, just 115 days after the American pioneer procedure. Jan Mikulicz Radecki introduced special gastric- and colon -operations in Europe and his name is also connected with the first endoscop. Both Balassa and Mikulicz were pioneers of their time, their scientific and moral effect determined the way of development of medical-surgical science in their homeland. Yukichi Fukuzawa’s work represent the advantages of international relations and high standard of education. After he visited US and several countries in Europe he realized the importance and necessity of the open world of science.

We are convinced that this symposium under the wonderful leadership of Professor Kitajima will be a successful meeting and contribute to the development of surgical science in our countries and will deepen the friendship of the Japanese, Hungarian and Polish surgeons. Beside of professors and chief surgeons of international reputation talented young surgeons and residents also have opportunity to present their studies.

Many thanks to our host, President of this symposium, Professor Masaki Kitajima, Secretaries General Drs. Masashi Yoshida and Norihito Wada and the Organizing Committee.

Take off for the future!

József Sándor, M.D., Ph.D., F.A.C.S.
Founding Co-President of JHPSS
Professor of Semmelweis University, Budapest, Hungary
Dear Colleagues Participants of the Scientific Meeting of the Japan-Hungary-Poland Surgical Society

The scientific meetings for surgeons of bilateral Japanese-Hungarian and Japanese-Polish Surgical Societies have a proud history dating to many years back. In June 2013 during the International Gastric Cancer Congress in Verona Professor Masaki Kitajima discussing with me and Professor Wojciech Kielan brought up an initiative to join these two surgical societies and organize the Scientific Symposium in the triangle formula of the Japan-Hungary-Poland Surgical Society.

Today I am extremely glad, that his initiative has become very quickly a meaningful event and soon we can meet in Tokyo on the Japan-Hungary-Poland Triangle Scientific Symposium.

I hope that Scientific Meetings of the JHPSS will be incorporated to the calendar of regular scientific cooperation and will help systematically for sharing knowledge and experience every two years intermittently in Japan, Hungary and Poland.

I am truly happy, that together with the experienced surgeons young scientist will actively participate in the upcoming meeting. I am convinced that it will contribute new energy and perspective to our three party enterprise and will facilitate a foundation of fruitful scientific cooperation and intensify friendship between surgeons from our countries.

I cordially welcome our friends from Japan, Hungary and Poland and wish to all participants of the Symposium to enjoy the great and inspiring time during the scientific sessions and visiting the exciting city Tokyo.

Grzegorz Wallner, M.D., Ph.D.

Founding Co-President of JHPSS
President of the Association of Polish Surgeons
Organizing Committee

JHPSS2014 President

Founding Co-Presidents
President of the 2nd and 4th Scientific Meeting of the Japan-Hungary-Poland Surgical Society
President of International University of Health and Welfare, Tokyo, Japan

József Sándor, M.D., Ph.D., F.A.C.S.
President of the 1st, 3rd and 5th Scientific Meeting of the Japan-Hungary-Poland Surgical Society
Professor of Semmelweis University, Budapest, Hungary

Grzegorz Wallner, M.D., Ph.D.
President of the Association of Polish Surgeons
Professor of Medical University of Lublin, Lublin, Poland

Secretary General
Dr. Masashi Yoshida (International University of Health and Welfare, Japan)
Dr. Norihito Wada (Keio University School of Medicine, Japan)

Local Organizing Committee
Takashi Aikou  Yuko Kitagawa  Motohide Shimazu
Hideo Baba  Seigo Kitano  Atsushi Sugiooka
Itaru Endo  Michiya Kobayashi  Yutaka Suzuki
Takashi Fukutomi  Hiroyuki Konno  Takashi Tajiri
Yoshiki Hiki  Koichiro Kumai  Minoru Tanabe
Masako Hiramatsu  Hiroyuki Kuwano  Ichiro Uyama
Koichi Hirata  Koutarou Maeda  Norihito Wada
Renzo Hirayama  Keiichi Maruyama  Go Wakabayashi
Tadashi Ikeda  Koichi Miwa  Masahiko Watanabe
Yoshifumi Ikeda  Zenichi Morise  Yuichi Yamashita
Shigeru Imoto  Shoji Natsugoe  Masashi Yoshida
Hitoshi Katai  Soji Ozawa  Kazuhiro Yoshida
Shigeyuki Kawachi  Hiroshi Shimada

Administrative Assistant
Ms. Kyoko Okuda (Keio University School of Medicine, Japan)
Congress Information

Date
Friday, October 17 to Sunday, October 19, 2014
  October 17 and 18 - Scientific program
  October 19 - Excursion

Venue (October 17 and 18)
8th floor of East Building, Mita Campus, Keio University, Tokyo, Japan
Address: 2-15-45 Mita, Minato-ku, Tokyo, 108-8345 Japan

Official Language
English

Registration
The registration desk will be located in the Foyer, 1F of the East Building.
It will be open during the following hours.
  Friday, October 17, 9:00 - 17:00
  Saturday, October 18, 8:30 - 16:00

Certificate of Attendance
Certificate of attendance will be given to all registered participants at the registration desk.

Name Badges
Please wear your name badge at all times during the congress for identification and security purposes. Only registered participants wearing a name badge will be allowed access to the session rooms and social programs.

Lunch
Lunch will be provided at the lunchtime on October 17 and 18.

JHPSS2014 Congress Secretariat
C/O Japan Convention Services, Inc. (JCS)
Daido Seimei Kasumigaseki Bldg.
1-4-2, Kasumigaseki, Chiyoda-ku, Tokyo 100-0013, Japan
Tel: +81 3 3508 1214 / Fax: +81 3 3508 1302
E-mail: 6jhpss@convention.co.jp
Instruction for Moderators and Speakers

Moderators
- All moderators are asked to be in their session room no later than 15 minutes prior to the session.
- Moderators should make effort to maintain the time schedule in cooperation with the time keeper, and give warnings to the speakers, if needed.

Oral Session
- Length of Presentation
  Oral Presentation: 9 minutes (6 minutes presentation, 3 minutes Q&A)
  Other Sessions: Announced by the congress secretariat

- Equipment
  OS: Windows 7

Speaker Preparation Desk
- Speakers Preparation Desk is located at the Meeting Room, 5F of the East Building. All speakers are requested to come to the Speaker Preparation Desk at least 30 minutes in advance of their presentations to verify if the data functions properly on the equipment provided.
- It will be open during the following hours.
  Friday, October 17, 9:00-16:00
  Saturday, October 18, 8:30-16:00
- Speakers will use PowerPoint presentations. All presentations will be loaded onto a server (At the Speaker Preparation Desk) and distributed to the Presentation room at an appropriate time via a LAN.

PowerPoint Presenters
- Bring your presentation on a Windows readable USB flash Drive. In case using a video files, you should bring your own laptop and make sure that the data is applicable to Windows Media Player.
- Only the standard fonts with Windows 7 (OS) (e.g., Arial, Arial Black, Century, Century Gothic, Times New Roman) are accepted for your presentation file, and unusual fonts may not be displayed properly on the computers in session rooms.
- Include any external files utilized (e.g. movie files) in the same folder as your presentation file. Copy the entire folder to the USB flash Drive.
- Video clips can be embedded in PowerPoint presentations, but it is strongly recommended to bring your own laptop with the original video file as a backup.
- In order to avoid virus infection, please scan your presentation file with updated anti-virus software beforehand.
- **Important note for Macintosh users**
  - You should bring your own Macintosh since there would be technical issues that can arise when PowerPoint files created on a Macintosh are run on a Windows PC.
  - Speakers using their own laptops MUST HAVE a VGA D-sub 15pin female output. Special video output cable is required for some laptops to use the D-sub 15pin to connect to external monitors and data projectors. Please note that we are not equipped with that special cable and you must bring it in case it is necessary. The laptop output resolution should be in XGA (1024×768). The higher resolutions than the native resolution (1024×768) would possibly lose some information or not project by forcing the data projector into a compression mode.
  - You should have your data backed up in case of any computer trouble.
  - Please turn off the screen-saver and energy saving mode beforehand.

- **COI**
  Please insert a COI disclosure slide as the 2nd slide, regardless of whether you have a conflict of interest or not.

## Poster Session

### What is Digital Poster?

The JHPSS2014 Congress in Tokyo will be accepting digital posters rather than physical printed posters for the first time. The digital poster format provides an excellent opportunity for presenters to utilise electronic, digital and visual displays to share their research, and to interact with delegates on an individual basis. Presenters using PowerPoint to create their poster can include video presentation. Accepted poster presenters are required to submit their poster as a PowerPoint file which will then be available on the monitor at the Digital Poster area on site.

### How is this more beneficial?

Digital posters will be able to include video files. Delegates will be able to search for posters by author or key words on the screens provided. Poster presenters will be given a scheduled time to present their poster to a small group.

### Length of presentation

6 minutes (4 minutes presentation and 2 minutes Q&A)

### File formats

- Any video formats which can be viewed with PowerPoint are acceptable.
- No audio files are available.

### File size

No larger than 200MB (including videos)

### Slide length

No more than 15 slides

### Screen ratio

4:3

- **COI**
  Please insert a COI disclosure slide as the 2nd slide, regardless of whether you have a conflict of interest or not.
Access

- 8 min. walk from Tamachi Station (JR Yamanote Line or Keihintohoku Line)
- 7 min. walk from Mita Station (Subway Asakusa Line or Subway Mita Line)
- 8 min. walk from Akabanebashi Station (Subway Oedo Line)

A Triangle of Collaboration for the Development of Advanced Surgery - Take off for the Future
Friday, October 17

15:20-16:20 / Lecture Room

Otani Memorial Symposium

Chairpersons: Toshirou Nishida (National Cancer Center Hospital East, Japan)
Jozsef Sandor (Semmelweis University, Hungary)
Wojciech Kielan (Medical University Wroclaw, Poland)

**SY-1**
Progress in the treatment of gastric cancer in Poland in the last four decades
Wojciech Kielan
2nd Department of General and Oncological Surgery, Medical University Wroclaw, Poland

**SY-2**
To be a surgeon or not to be
Jozsef Sandor
Surgical Department, United St. Steven’s and St. Ladislaus’ Hospital, Department of Surgical Research and Techniques, Semmelweis University, Hungary

**SY-3**
Long term outcomes of laparoscopic surgery for gastrointestinal stromal tumors (GIST) of the stomach
Toshiharu Furukawa, Norihito Wada
Department of Surgery, School of Medicine, Keio University, Japan

**SY-4**
Perspective of diagnosis and treatment of gastrointestinal submucosal tumors and GIST
Toshirou Nishida
National Cancer Center Hospital East, Japan
Friday, October 17

9:30-10:15 / Lecture Room

**Oral Session 1: Hepato-Biliary**

Chairpersons: Koichi Hirata *(Sapporo Medical University, Japan)*
Michiya Kobayashi *(Kochi Medical School, Japan)*
Oszkar Hahn *(Semmelweis University, Hungary)*

**O1-1** Caudal approach of pure laparoscopic hepatectomy for the tumors in the dorsal right liver
Zenichi Morise
*Surgery, Fujita Health University School of Medicine Banbuntane Houtokukai Hospital, Japan*

**O1-2** Pure laparoscopic hepatectomy for HCC with severe liver dysfunction
Zenichi Morise
*Surgery, Fujita Health University School of Medicine Banbuntane Houtokukai Hospital, Japan*

**O1-3** Common bile duct injuries during laparoscopic cholecystectomies
Miklos Mate
*Department of General Surgery, St. Emeric University Teaching Hospital, Hungary*

Oral Session 3: Colo-rectal Surgery

Chairpersons: Koutarou Maeda (Fujita Health University, Japan)
Adam Janusz Dziki (Medical University Lodz, Poland)

O3-1 Exfoliated cancer cells in the colorectal lumen during cancer surgery
Koutarou Maeda
Department of Surgery, Fujita Health University, Aichi, Japan

O3-2 Number of the lymph nodes (LN) as prognostic factor in rectal cancer
Adam Janusz Dziki
Department of General and Colorectal Surgery, Medical University Lodz, Poland

O3-3 Abdominosacral amputation of the rectum (ASAR) for low rectal cancers: fifteen years of experience
Marek Bebenek
Department of Surgical Oncology, Lower Silesian Comprehensive Cancer Center, Poland

O3-4 Results of laparoscopic colon operations performed at our department between 2012 and 2014
Bence Kecskedi
Dept. of Surgery, St. Istvan and St Laszlo Hospital, Budapest, Hungary

13:20-14:25 / Lecture Room

Oral Session 4: Upper GI

Chairpersons: Keiichi Maruyama (University of Health and Welfare Sanno Hospital, Japan)
Seigo Kitano (Oita University, Japan)
Tomasz Skoczylas (Medical University of Lublin, Poland)

O4-1 A nickeletitanium memory-shape device for gastrojejunostomy: comparison of the compression anastomosis clip and a hand-sewn anastomosis
Katarzyna Kusnierz
Department of Gastrointestinal Surgery, Medical University of Silesia, Poland
O4-2  Our own experience in metabolic surgery of morbid obesity treatment
Jacek Dadan
1st Department of General and Endocrinological Surgery, Medical University of Bialystok, Poland

O4-3  Quality of life after bariatric surgery
Piotr Major
2'nd Department of General Surgery, Jagiellonian University Collegium Medicum, Poland

O4-4  The abberant course of the right carotid artery, leading to upper GI hemorrhage. Case report
Laszlo Regali
Surgical-, Vascular- and Thoracic Surgical Department, Bajcsy-Zsilinszky Hospital and Outpatient Department, Hungary

O4-5  Prognostic nutritional index and modified Glasgow prognostic score, clinical features, and prognosis in a database of 310 esophageal cancers
Kazuto Harada
Department of Gastroenterological Surgery, Graduate School of Medical Science, Kumamoto University, Japan

O4-6  Neoadjuvant chemotherapy using Docetaxel/CDDP/5-FU (DCF) followed by surgery may improve patient survival in patients with esophageal squamous cell carcinoma
Natsuya Katada
Department of Surgery, Kitasato University School of Medicine, Japan

O4-7  The quest for a useful immunohistochemical profile associated with disrupted balance of MMPs/TIMPs and lymphangiogenic factors in gastric cancer prognosis - a Herculean task?
Piotr Donizy
Department of Pathomorphology and Oncological Cytology, Wroclaw Medical University, Poland
Oral Session 5: Vascular and Transplantation

Chairpersons: Itaru Endo (Yokohama City University, Japan)
               Gerda Toth (Semmelweis University, Heart and Vascular Center, Hungary)

O5-1  Humacyte first human acellular graft for hemodialysis. Single centre experience.
      Marek Ilzecki
      The Department of Vascular Surgery and Angiology, Medical University of Lublin, Poland

O5-2  Clinical outcomes of isolated dissection of superior mesenteric artery
      Tatsuya Shimogawara
      Department of Surgery, Keio University, Japan

O5-3  A rare cause of ilio-femoral deep vein thrombosis in young adults: unknown asymptomatic chronic inferior vena cava occlusion
      Gerda Toth
      Department of Vascular Surgery, Semmelweis University, Heart and Vascular Center, Hungary

O5-4  Incidence and outcomes of de novo malignancies after living donor liver transplantation
      Taizo Hibi
      Department of Surgery, Keio University School of Medicine, Japan

O5-5  Personalised surgical repair of left ventricle aneurysm with computer assisted ventricular engineering
      Istvan Hartyanszky
      Cardiac Surgery Department, Semmelweis University, Heart and Vascular Center, Hungary
Saturday, October 18

9:00-10:05 / Lecture Room

Oral Session 6: Novel Technique and Education
Chairpersons: Takashi Aikou (Seiunkai Hospital / Professor Emeritus, Kagoshima University, Japan)  
Gyorgy Weber (Semmelweis University, Hungary)

O6-2 The establishment of acute care surgery at the department of gastroenterological surgery, Fukuoka university  
Daibo Kojima  
Department of gastroenterological surgery, Fukuoka university school of medicine, Japan

O6-3 First results in initiating a qualification for laparoscopic cholecystectomy in Hungary  
Timea Kakucs  
1st Department of Surgery, Semmelweis University, Hungary

O6-4 Are there real limitations in transanal endoscopic operation technique?  
Attila Zarand  
1st Department of Surgery, Semmelweis University Budapest, Hungary

O6-5 Individualized minimally invasive surgery based on sentinel node concept for early gastric cancer  
Ayako Shimada  
Department of Surgery, Keio University School of Medicine, Japan

O6-6 Concept for laparoscopic dissection of lymph node no. 7, 9, and 11p for advanced gastric cancer  
Yoshinori Ishida  
Department of Surgery, Fujita Health University, Japan

O6-7 New surgical strategies against gastric submucosal tumor  
Yoshiaki Shoji  
Department of Surgery, Keio University School of Medicine, Japan
10:05-11:30 / Lecture Room

Oral Session 7: Novel Surgical Technique

Chairpersons: Kazuhiro Yoshida (Gifu University, Japan)
Geza Laszlo Lukacs (University of Debrecen, Hungary)

O7-1 Electrospun Poly(vinyl)alcohol nanofibers for tissue replacement
Daniella Feher
Department of Surgical Research and Techniques, Semmelweis University, Hungary

O7-2 Biomimetic matrix mesh for laparoscopic hernia repair
Gyorgy Weber
Department of Surgical Research and Techniques, Semmelweis University, Budapest, Hungary

O7-3 Novel opportunities in multimodal postoperative pain management. Introducing liposomal bupivacaine
Andras Sandor
Surgery, Commonwealth Surgical Associates, Stoneham, Massachusetts, United States

O7-4 HyperEye medical system for detecting indocyanine green fluorescence positive sentinel nodes and development of color, high resolution fluorescent laparoscopy
Masashi Yoshida
Department of Surgery, International University of Health and Welfare Hospital, Japan

O7-5 A case of late lymph node metastasis after three endoscopic mucosal resections of intramucosal gastric cancers
Eisuke Booka
Department of Surgery, School of Medicine, Keio University, Japan

O7-6 Bidirectional Approach of Video Assisted Neck Surgery (BAVANS) endoscopic complete central node dissection in thyroid cancer surgery
Akihiro Nakajo
Department of Digestive, Breast and Thyroid Surgery, Kagoshima University, Japan

O7-7 Everything you wanted to know about recurrent laryngeal nerve in thyroid surgery
Geza Laszlo Lukacs
Institute of Surgery, Regional Center for Endocrine and Breast Surgery, University of Debrecen, Hungary
**O7-8** Newly established endocrine surgery  
Zsolt Tibor Csapo  
Department of Surgery, Flor Ferenc Hospital, Kistarcsa, Hungary

**O7-9** Immediate provisionalisation of dental implants  
Attila Horvath  
Dept. of Periodontology, Semmelweis University, Hungary

---

**Oral Session 8: Pancreas**

Chairpersons: Yuichi Yamashita (Fukuoka University School of Medicine, Japan)  
Pawel Lampe (Medical University of Silesia, Poland)

---

**O8-2** The significance of lymph node metastasis in pancreatic neuroendocrine tumor  
Katsunobu Taki  
Department of Gastroenterological Surgery, Graduate School of Kumamoto University, Japan

**O8-3** Considering the pancreatic duct  
Stanislaw Antony Hac  
General Endocrine & Transplant Surgery, Medical University of Gdansk, Poland

**O8-4** A comparison of the two invagination techniques for pancreateojunostomy after pancreatoduodenectomy  
Pawel Lampe  
Department of Gastrointestinal Surgery, Medical University of Silesia, Poland

**O8-5** Relationship between intraoperative blood loss and prognosis in pancreatic cancer  
Kota Arima  
Department of Gastroenterological Surgery, Graduate School of Medical Science, Kumamoto University, Japan

**O8-6** The impact of various types of post-pancreatoduodenectomy reconstruction on gastrointestinal motility and exocrine pancreatic function  
Slawomir Mrowiec  
Department of Gastrointestinal Surgery, Medical University of Silesia, Katowice, Poland
Detection and cultivation of circulating tumor cells in cancer patients
Rafal Matkowski
Division of Surgical Oncology and Department of Oncology, Wroclaw Medical University, Poland

Docetaxel/Cisplatin/S1 neoadjuvant chemotherapy may be a promising strategy against advanced gastric cancer with high risk macroscopic appearance (Type IV and large Type III)
Keishi Yamashita
Department of Surgery, Kitasato University School of Medicine, Japan

A multicenter phase II study to evaluate neoadjuvant-synchronus S-1+RT for locally advanced rectal cancer
Masafumi Inomata
Department of Gastroenterologic and Pediatric Surgery, Oita University Faculty of Medicine, Japan

Importance of adjuvant therapy and best supportive care in advanced pancreatic cancer
Balazs Tihanyi
1st Department of Surgery, Semmelweis University, Hungary

Treatment of unresectable and metastatic GIST
Dasiuke Izumi
Department of Gastroenterological Surgery, Kumamoto University, Japan

Translating surgical skills training to clinical practice
Mihaly Boros
Institute of Surgical Research, University of Szeged, Hungary
Oral Session 10: Esophagus
Chairpersons: Koichi Miwa *(Toyama Rosai Hospital, Japan)*
Andras Sandor *(Commonwealth Surgical Associates, Stoneham, Massachusetts, United States)*
Grzegorz Wallner *(Medical University of Lublin, Poland)*

O10-1  Thoracoscopic and laparoscopic esophagectomy for minimally invasive surgery
Hironori Ohdaira
*Department of Surgery, International University of Health and Welfare Hospital, Japan*

O10-2  Gastroesophageal reflux disease in Polish population, a single center retrospective analysis of MIIpH studies
Michał Solecki
*2nd Department of General & Gastrointestinal Surgery & Oncological Surgery of the Alimentary Tract, Medical University of Lublin, Poland*

O10-3  Results of surgical treatment of GERD, a multicenter, retrospective study
Grzegorz Wallner
*Second Department of General & Gastrointestinal Surgery & Surgical Oncology of the Alimentary Tract, Medical University of Lublin, Poland*

O10-4  Application of laparoscopic Nissen fundoplication in hiatus hernia repair in our own experience
Magdalena Luba
*1st Department of General and Endocrinological Surgery, Medical University of Bialystok, Poland*

O10-5  Esophagectomy and combined lobectomy with a covering latissimus dorsi muscle flap for an esophago-pulmonary fistula due to advanced esophageal cancer: report of two cases
Ippei Yamana
*Gastroenterological Surgery, Fukuoka University Faculty of Medicine, Japan*

O10-6  A study of esophagectomy after chemoradiation therapy for esophageal cancer
Yu Kigasawa
*Department of Surgery, Keio University School of Medicine, Japan*
Oral Session 11: Liver

Chairpersons: Takashi Tajiri (Nippon Medical School, Japan)
Geza Telek (St. Istvan and St. Laszlo Hospital, Hungary)

O11-1 Functional and morphological changes during triggered liver regeneration
Andras Fulop
1st Department of Surgery, Semmelweis University, Hungary

O11-2 Portal vein occlusion techniques in liver surgery
Oszkar Hahn
1st Department of Surgery, Semmelweis University, Hungary

O11-3 Laparoscopic anatomical liver resection by Glissonean pedicle approach
Yutaro Kato
Department of Hepatobiliary and Transplant Surgery, Fujita Health University, Japan

O11-4 Pure laparoscopic caudate hepatectomy for cancer: surgical technique and a report of a case
Ryo Nishiyama
Department of Surgery, Kitasato University, Japan

O11-5 ALPPS <Associating Liver Partition & Portal vein ligation for Staged hepatectomy>. Our results
Oszkar Hahn
1st Department of Surgery, Semmelweis University, Hungary

O11-6 Demonstration of the effects of portal vein ligation on glucose metabolism using in vivo multi-modal PET/MRI measurements in healthy rat liver
Andras Fulop
1st Department of Surgery, Semmelweis University, Hungary
Friday, October 17

16:30-17:30 / Lecture Room : Poster Booth 1

Poster Session 1: Colo-rectal Surgery 1 / Hepato-biliary-pancrea 1

Chairpersons: Koichiro Kumai (Hino Municipal Hospital, Japan)
Marek Bebenek (Lower Silesian Comprehensive Cancer Center, Poland)

P1-2 Decompression of acute left-sided malignant colorectal obstruction by proximal diversion: comparison with emergency surgery
Masashi Momiyama
Department of Gastroenterological Surgery, Yokohama City University, Japan

P1-3 A rare case of ileocecal mucormycosis during induction therapy of acute lymphoblastic leukemia
Gyorgy Saftics
Department of Surgery, Szent Istvan es Szent Laszlo Hospital, Hungary

P1-4 The optimal dividing line of the jejunum for pancreatoduodenectomy
Hiroki Ueda
Department of Hepatobiliary and Pancreatic Surgery, Tokyo Medical and Dental University, Japan

P1-5 Unusual and innovate treatment of anastomotic biliary obstruction in advanced pancreatic cancer
Ewelina Frejlich
2nd Department of General and Oncological Surgery, Wroclaw Medical University Hospital, Poland

P1-6 Efficacy of the bioabsorbable sheet wrapping with fibrin-glue for the pancreatic stump after distal pancreatectomy
Daisuke Ban
Department of Hepatobiliary and Pancreatic Surgery, Tokyo Medical and Dental University, Japan
### Poster Session 2: Hepato-biliary-pancrea 2

Chairpersons: Minoru Tanabe *(Tokyo Medical and Dental University, Japan)*  
Janos Posan *(University of Debrecen, Medical Center, Hungary)*

| P2-1 | Extracellular vesicles as biomarkers in pancreatic cancer  
|------|------------------------------------------------------------|
|      | Akos Szucs  
|      | *1st. Department of Surgery, Semmelweis University, Hungary*  
|      | **P2-2** Immunological impact of neoadjuvant chemoradiotherapy for pancreatic cancer  
|      | Yuki Homma  
|      | *Department of Gastroenterological Surgery, Yokohama City University School of Medicine, Japan*  
|      | **P2-3** Laparoscopic resection for benign liver lesions  
|      | Janos Posan  
|      | *Department of Surgery, University of Debrecen, Medical Center, Hungary*  
|      | **P2-4** Response to preoperative hepatic arterial chemotherapy predicts oncologic outcome of resection for hepatocellular carcinoma with extensive portal vein invasion  
|      | Yutaro Kato  
|      | *Department of Hepatobiliary and Transplant Surgery, Fujita Health University, Japan*  
|      | **P2-5** Homeobox B9 expression, associated with poor prognosis, is a potential predictor of sensitivity to sorafenib in hepatocellular carcinoma  
|      | Naokazu Chiba  
|      | *Department of Digestive and Transplantation Surgery, Tokyo Medical University Hachioji Medical Center, Japan*  
|      | **P2-6** Clinical efficacy of surgery combined with neoadjuvant chemoradiation therapy for unresectable locally advanced pancreatic cancer  
|      | Kiminori Takano  
|      | *Department of Digestive and Transplantation Surgery, Tokyo Medical University Hachioji Medical Center, Japan*  

Poster Session 3: Stomach / Oral cavity 1

Chairpersons: Hitoshi Katai (National Cancer Center, Japan)
Ichiro Uyama (Fujita Health University, Japan)
Stanislaw Antony Hac (Medical University of Gdansk, Poland)

P3-1 Reduced port surgery in laparoscopic appendectomy: a retrospective comparative study
Akira Muraki
Institute of Gastroenterology, Nippon Medical School Musashi-kosugi Hospital / Higashi-Totsuka Memorial Hospital, Japan

P3-2 Extreme acute gastric dilation after a bulimic attack
Endre Gyurokovics
Surgical Vascular- and Thoracic Surgical Department, Bajcsy Zsilinszky Hospital and Outpatient Department, Hungary

P3-3 Delta-shaped anastomosis in totally robotic Billroth I gastrectomy
Shuhei Kajiwara
Department of Surgery, Fujita Health University, Japan

P3-4 Laparoscopic proximal gastrectomy with double-tract reconstruction for early gastric cancer
Shiro Iwagami
Department of Gastroenterological Surgery, Graduate School of Medical Sciences, Kumamoto University, Japan

P3-5 Distribution of lymphatic vessels in gastric cancer
Julia Rudno- Rudzinska
2-nd Department of General and Oncological Surgery, Medical University of Wroclaw, Poland

P3-6 Study of adjuvant chemotherapy after gastrectomy in the patients aged over 80
Toshiyuki Tanahashi
Department of Surgical Oncology, Gifu University, Japan

P3-7 Preoperative S-1 and docetaxel combination chemotherapy in patients with locally advanced gastric cancer
Takashi Kosaka
Department of Gastroenterological Surgery, Yokohama city university Graduate School of Medicine, Japan
Laparoscopic sleeve gastrectomy in a Japanese institute
Masayuki Ohta
Department of Gastroenterological and Pediatric Surgery, Oita University Faculty of Medicine, Japan

16:30-17:30 / Lecture Room: Poster Booth 4

Poster Session 4: Thoracic Surgery 1
Chairpersons: Soji Ozawa (Tokai University School of Medicine, Japan)
Yoshifumi Ikeda (International University of Health and Welfare Mita Hospital, Japan)
Laszlo Hidi (Semmelweis University, Hungary)

Relations between obesity and postoperative complication in patients with esophageal cancer
Yuji Kikuchi
Department of surgery, Keio university school of medicine, Japan

Added value of chemotherapy and chemoradiotherapy to surgical resection of squamous cell carcinoma of the esophagus, the results of multicenter randomized clinical trial
Tomasz Skoczylas
2nd Department of General & Gastrointestinal Surgery & Oncological Surgery of the Alimentary Tract, Medical University of Lublin, Poland

Thoracoscopic surgery for submucosal tumor of the esophagus
Junya Oguma
Department of Gastroenterological Surgery, Tokai University School of Medicine, Japan

Pedunculated gastric conduit interposition with duodenal transection: an option for increasing the flexibility of the gastric conduit
Yoshifumi Baba
Department of Gastroenterological Surgery, Graduate School of Medical Sciences, Kumamoto University, Japan

Mediastinoscope assisted transhiatal esophagectomy for the old aging patients with esophageal cancer
Hiroshi Okumura
Department of Digestive Surgery, Breast and Thyroid Surgery, Kagoshima University, Japan
P4-6  Paradoxical embolisation through patent foramen ovale  
Laszlo Hidi  
Heart and Vascular Center, Department of Vascular Surgery, Semmelweis University, Hungary

P4-7  Influence of mesenchymal stem cells to differentiation from stem cells to hepatocytes  
Chisato Takagi  
Department of Surgery, Keio University, Japan

16:30-17:30 / Meeting Room : Poster Booth 5

Poster Session 5: Transplantation / Breast  
Chairpersons: Shigeyuki Kawachi (Tokyo Medical University Hachioji Medical Center, Japan)  
Csaba Kosa (University of Debrecen, Hungary)

P5-1  Intestinal cold storage in PACAP-38 containing preservation solution  
Andrea Ferencz  
Department of Surgical Research and Techniques, Semmelweis University, Hungary

P5-2  Role of GPNMB in breast cancer  
Manabu Futamura  
Department of breast and molecular oncology, Gifu University, Graduate School of Medicine, Japan

P5-3  Phase II study on radiofrequency ablation in early breast cancer  
Shigeru Imoto  
Department of Breast Surgery, School of Medicine Kyorin University, Japan

P5-4  Adjuvant chemotherapy availability for lymph node metastasis of hormone receptor positive breast cancer patients  
Hiroshi Nishimiya  
Department of Surgery, University of Kitasato, Japan

P5-5  Predictive factors of invasion with initial diagnosis of ductal carcinoma in situ based on core biopsy  
Csaba Kosa  
Institute of Surgery, University of Debrecen, Hungary
### Saturday, October 18

**16:45-17:45 / Lecture Room : Poster Booth 1**

**Poster Session 6: Colo-rectal Surgery 2**

Chairpersons: Zenichi Morise *(Fujita Health University, Japan)*  
Endre Gyurkovics *(Bajcsy Zsilinszky Hospital and Outpatient Department, Hungary)*

P7-2  Expression levels of the cell adhesion molecules of the cadherin group in colorectal cancer patients
Witko Jan Krawczyk
Polish Surgeon Society, Poland

P7-3  Evaluation of treatment for rectal neuroendocrine tumor (NET) comparing the World Health Organization 2010 classification
Nobuhisa Matsuhashi
Surgical Oncology, Gifu University, Japan

P7-4  Examination of protective effect of ischemic postconditioning after small bowel autotransplantation
Andrea Ferencz
Department of Surgical Research and Techniques, Semmelweis University, Hungary

P7-5  Benefits of a total laparoscopic approach for ulcerative colitis surgery: a retrospective single center study
Masanori Naito
Department of Surgery, Kitasato University, School of Medicine, Japan

16:45-17:45 / Lecture Room : Poster Booth 3

Poster Session 8: Minimally Invasive Surgery
Chairpersons: Yutaka Suzuki (International University of Health and Welfare, Japan)
Ferenc Juhasz (University of Debrecen, Hungary)

P8-1  Application of the three-dimensional flexible endoscope in reduced-incision laparoscopic surgery: initial clinical experience
Ichiro Tsunematsu
Department of Surgery, Takatsuki Red Cross Hospital, Japan

P8-2  The efficiency of TAP Block in prevention of postoperative pain in patients undergoing bariatric surgery in comparison to local anesthesia with bupivacaine application
Piotr Major
2'nd Department of General Surgery, Jagiellonian University Collegium Medicum, Poland
P8-3  An alternative minimal invasive technique (HALS) during transperitoneal laparoscopic adrenalectomy (LA). Advantages and disadvantages
Ferenc Juhasz
Surgical Institute, University of Debrecen, Hungary

P8-4  Single-incision laparoscopic surgery for small bowel diseases: our initial experience
Kenji Baba
Department of digestive surgery, breast and thyroid surgery, Kagoshima University, Japan

P8-5  Laparoscopic sleeve gastrectomy as an effective method of morbid obesity, type 2 diabetes, metabolic syndrome and co-morbidities treatment in our own experience
Hady Razak Hady
1st Department of General and Endocrinological Surgery, Medical University of Białystok, Poland

P8-6  Role of laparoscopy in the management of accidentally revealed intraabdominal tumors
Balazs Rozsa
Department of General Surgery, St. Emeric University Teaching Hospital, Hungary

16:45-17:45 / Lecture Room: Poster Booth 4

Poster Session 9: Oral cavity 2 / Thoracic Surgery 2
Chairpersons: Norihito Wada (Keio University School of Medicine, Japan)
Peter Windisch (Semmelweis University, Hungary)

P9-1  The use of platelet-rich plasma (PRP) in periodontal tissue regeneration
Ferenc Dori
Department of Periodontology, Semmelweis University, Hungary

P9-2  Reconstruction of the lost alveolar hard and soft tissue: a stepwise approach
Peter Windisch
Department of Periodontology, Semmelweis University, Hungary

P9-3  Biological adjuncts in periodontal plastic surgery
Balint Molnar
Department of Periodontology, Semmelweis University, Hungary
P9-4  Case report of the operation of an object penetrating from the stomach through the diaphragm to the thoracic cavity
Csilla Kispal
Surgical, Vascular Surgical and Chest Surgery Department, Bajcsy-Zsilinszky Hospital and Outpatient Departement, Hungary

P9-5  Preoperative neutrophil/lymphocyte ratio is significantly associated with prognosis in patients with esophageal squamous cell carcinoma
Keisuke Kosumi
Department of Gastroenterological Surgery, Kumamoto University, Japan

16:45-17:45 / Meeting Room : Poster Booth 5
Poster Session 10: Transplantation / Breast / Vascular
Chairpersons: Tadashi Ikeda (Teikyo University School of Medicine, Japan)
Go Wakabayashi (Iwate Medical University School of Medicine, Japan)
Gabor Szabo (Semmelweis University, Hungary)

P10-1  Prognostic factors of regional recurrences after negative sentinel lymph node biopsy
Hanako Ueno
Department of Surgery, Keio University School Of Medicine, Japan

P10-2  Local recurrence and prognosis in the breast cancer patients with micrometastases in sentinel lymph node
Toshiaki Kurihara
Department of Sugery, Keio University School of Medicine, Japan

P10-3  Survey of the effect of Aspirin on kidney transplant patients
Dora Praksch
Department of Surgery, University of Pecs, Hungary

P10-4  NIM-811: a new pharmacological compound for managing complications induced by lower limb vascular surgery
David Garbaiasz
1st Department of Surgery, Semmelweis University, Budapest, Hungary

P10-5  Ruptured aorta aneurysm: a case for open surgery instead of EVAR
Gabor Szabo
Department of Cardiovascular Surgery, Semmelweis University, Hungary
P10-6  Endovascular treatment of connective tissue disease patients with leg ulcers caused by critical limb ischemia
Koji Ochiai
Departments of Surgery, Keio University School of Medicine, Japan

P10-7  Treatment of proximal deep venous thrombosis: local fibrinolysis, pharmacomechanical thrombus aspiration (Angiojet) and venous stenting
Aniko Berencsi
Vascular Surgery, Semmelweis University, Hungary

P10-8  Efficacy and safety of recombinant soluble thrombomodulin on disseminated intravascular coagulation associated with gastroenterological surgery
Daisuke Hashimoto
Department of Gastroenterological Surgery, Kumamoto University, Japan

P10-9  Nonoperative management ot patients with blunt splenic injury: impact of splenic artery embolization
Krystyn Sosada
Department of General and Bariatric Surgery and Emergency Medicine, Medical University of Silesia, School of Medicine with the Division of Dentistry in Zabrze, Poland

P10-10  The role of inflammatory cytokins in atherosclerotic plaque rupture in patients with ST-segment elevation myocardial infarction
Peter Ezer
Cardiac Surgery, Heart Institute, University of Pecs, Hungary
Friday, October 17

12:20-13:10 / Lecture Room

**Lunchtime Invited Lecture**

Chairperson: Shoji Natsugoe *(Graduate School of Medical Sciences, Kagoshima University, Japan)*

**LS** Current status and future perspectives of minimally invasive thoracoscopic esophagectomy

Yuko Kitagawa

*Department of Surgery, Keio University School of Medicine, Japan*

Sponsored by: Johnson & Johnson K.K
