

## Observation of Laparoscopic Surgery

Date: Wednesday, September 6th, 2017 13:00PM-17:00PM

We are pleased to announce that laparoscopic live surgery using 4K camera & monitor system by Prof. Masaaki Andou at Kurashiki Medical Center.

The course is designed for the participants to learn the practical aspect of basic approach to gynecologic malignant disease and pelvic anatomy laparoscopically.

The participants can observe the advanced laparoscopic surgery in OR. Please note that it takes place in a group of about ten people due to a space limitation. But, the participants can watch with 4K monitor vision in satellite room, as same as in OR.

We look forward to welcoming you in Kurashiki.

Surgeon: Masaaki Andou MD, PhD (Director of Kurashiki Medical Center)

He has experienced more than 10,000 cases of laparoscopic surgery from 1997 including radical hysterectomy, pelvic/para-aortic lymphadenectomy, ovarian cancer surgery, deeply infiltrating endometriosis surgery, myomectomy, sacral colpopexy, etc.
