Double-positive joint in clinical and ultrasound predicts structural damage than single-positive in rheumatoid arthritis patients treated with biologics
Michihiro Ogawara (Juntendo University, Tokyo, Japan)

Anti-cyclic citrullinated peptide antibody is an independent risk factor contributed to RA joint destruction
Dong Yun Zou (Peking University People's Hospital, China)

Detection of IgM anti-citrullinated protein antibody activity in the serum of patients with rheumatoid arthritis
Hisakata Yamada (Kyushu University, Japan)

The expression level of IL-6, JAK2, JAK3, STAT3, MMP-3, MMP-13 in rheumatoid arthritis and their correlation
Na Liu (University of Anhui Medical, China)

Explore the significance of RF, CCP, ANA in patients with hepatitis B virus infection
Cheng Xu (The First Affiliated Hospital of Anhui Medical University, China)

Risk factors of myocardial infarction occurrence in patients with rheumatoid arthritis
Weiping CI (Beijing Anzhen Hospital, Capital Medical University, China)

Aminopeptidase (APN/CD13) and the Correlation of Bone Erosion of Rheumatoid Arthritis
Zhao Qin (Lanzhou University, China)

Expression and Clinical Relevance of IRAK-M in Monocytes and Clinical Relevance in Patients with Systemic Lupus Erythematosus
Wenlan Zhang (The first affiliated hospital of Baotou Medical College, China)

Clinical features of primary Sjogren’s syndrome associated lung involvement with extraglandular manifestations at onset
Hui Gao (Peking University International Hospital, China)

Leukemoid reaction in a rheumatoid arthritis patient with sepsis complicated by multiple organ embolism
Xuan Wang (Xiangya Hospital of Central South University, China)

Focal segmental glomerulosclerosis lagged behind the onset of rheumatoid arthritis by seven years: a case report and review of the literature
Yang Liu (Shanxi Medical University, China)

The epigenetic induction of aggressive phenotype of fibroblast-like synovial cells (FLS) in rheumatoid arthritis, the role of DNA demethylation enzyme TET3
Kazuhisa Nakano (University of Occupational and Environmental Health, Japan)
P14 Systemic infection with Mycoplasma fermentans facilitates development of arthritis in the knock-in mice gp130F759 through the action of neutrophils
Ayano YAHAGI (Kawasaki medical school, Japan)

P15 Gene modules correlated with disease activity and treatment identified from CD4+ T cell subsets of Rheumatoid Arthritis
Shuji Sumitomo (The University of Tokyo, Japan)

P16 Analysis of T cell repertoire diversity of CD4+ T cells by next generation sequencing and its association with clinical parameters in rheumatoid arthritis
Keiichi Sakurai (The University of Tokyo, Japan)

P17 Increases in pathogenic Th17 cells and serum IL-1 beta in obese patients with rheumatoid arthritis
Hirofumi Shoda (The University of Tokyo, Japan)

P18 Synergistic effects of combination therapy with MTX and CTX on Osteoclast-Related Cytokines in Collagen-Induced Arthritis
Jing Luo (The Second Hospital of Shanxi Medical University, China)

P19 Effects of mir-124a on the expression of IL-6 and TNF-a and the change of cell cycle of mouse macrophages J774.1 cell line
Fangrui Yin (The first affiliated hospital of Baotou Medical College, China)

P20 The Therapeutic Effect of Osteopontin small interfering RNA on Lupus Nephritis of MRL/Lpr Mice
Chunyan Pang (The first affiliated hospital of Baotou Medical College, China)

P21 Effects of hypoxia-preconditioning ADSCs transplantation on repairing damaged kidney of MRL/lpr mouse
Wei Zhang (The first affiliated hospital of Baotou Medical College, China)

P22 Mechanism analysis of adipose tissue-derived stem cells on BLM-Induced mice of Scleroderma
Yongfu Wang (The first affiliated hospital of Baotou Medical College, China)
